- 16:00 – 17:00 Coffee and Trade Exhibition

PROFESSIONAL FIRE ENGINEERING

The Institution of Fire Engineers was founded in 1918 by a group of Chief Officers of the Fire Brigades in the United Kingdom, with the objectives:

To promote, encourage and improve the science and practice of Fire Extinction, Fire Prevention and Fire Engineering and all operations and expedients connected therewith, and to give an impulse to ideas likely to be useful in connection with or in relation to such science and practice to the members of the institution and to the community at large.

The Institution provides and administers the forum for educational qualifications in the fire community, a network of universities and colleges throughout the UK and actively supports the Chair in Fire Engineering at the University of Central Lancashire. The B.Eng. (Fire) degree at UCL has been accredited as fulfilling academic requirements for C.Eng. Status.

The Institution has been certified by the Engineering Council as a Nominating Body and as such is able to register members with the appropriate qualifications as Chartered Engineers or Incorporated Engineers.

It is now widely recognised as the only professional organisation, which provides for Fire Engineers public recognition of their qualifications.

Due to its wide acceptance it has become a major influence both nationally and internationally in the sphere of fire engineering. At present there are 50 branches worldwide with membership exceeding 11,000.

Branches and groups are active throughout the world and offer to the membership the opportunity of extending their contacts and knowledge, whilst also making a greater contribution to the profession.

The Irish Branch contributes to the aims of the Institution by assisting members to sit for the different examinations and by organising an Annual Fire Conference.

This year the Branch is organising its 31st Annual Fire Conference. As can be seen from the Conference Programme, the speakers will cover a wide range of subjects relating to Fire Safety.

Delegates attending will be afforded the opportunity to benefit from the expert panel of speakers assembled for this conference. At the conclusion of each session there will be a question and answer period.
